

Current Version of ACLS Tracker is: v1.0.31

By: Frank Li, MWAC, UNSW

v1.0.31

28.04.2016

Typo errors fixed

"Select Account/Project" display error fixed

Logout bug fixed

Inactivity Detection for AutoLogout function added:

In conf file:

InactivityCheck=yes (yes: function on; no: function off)

InactivityTimer=1 (in Minute)

In log file:

Normal logout by AutoLogout function is showed as:

Username: logged out at 02/05/2016 13:07:30 by AutoLogout

Abnormal logout by AutoLogout function is showed as:

Username: Forced logged out at 02/05/2016 13:07:30 by AutoLogout

DisableTaskmgr Function has been tested compatible with Windows 8/8.1/10 if the tracker is run as administrator while the UAC is turned off

Missing parameter in setting file will not crash the program anymore.

v1.0.30

25.11.2015

1. Now the logout function is able to record the fail logout attempt caused by server-client communication.

2. Logging function updated for the new logout function
