TERMS and CONDITIONS:

The BMIF Biospecimen preparation laboratory is a PC1 facility; only non-radioactive risk group 1 organisms will be accepted for processing. Viral transfected cell lines or tissues derived from GMOs MUST no longer be viable.

Samples must be provided to the BSP lab in a slide box or sealed specimen container labeled with your contact details and appropriate safety label(s).

Once completed you will be notified by a BSP staff member that your images are ready for collection.

DECLARATION:

I.....have read and understood the above listed sample limitations (PC1 samples only) and Terms and conditions. I have informed my supervisor of the prices listed on this form for processing my samples, and we agree to pay for the service outlined accordingly.
